### THOUGHT FOR THE MONTH

“And then there is the most dangerous risk of all is the risk of spending your life not doing what you want on the bet you can buy yourself the freedom to do it later.” — Randy Komisar

The London and area **Pro Fleet Care** group of **John Klassen, Abe Klassen** along with the president of the company, **Greg Lawrie** were our hosts for the April meeting at Fanshawe College. John and Greg were their presenters and they put together a wonderful presentation about the **mobile** rust control business and why their core values gives the customer unparalleled service. John talked how their environmental friendly chemicals displace water and are used in a special two step application process so that every area is being treated. **ROC 40** is the lighter rust proofing product that penetrates seams and is ideal for interior panels and hard to reach areas. **ROC 50** is their heavier rust proofing product that is used in high traffic areas where extra protection is needed and has been developed for areas such as frame rails. Being a mobile rust control service gives their customers many advantages. Need the application done during non peak business hours, have a special request or unusual piece of equipment? That is never a problem for **Pro Fleet Care**. They are happy to accommodate and have the expertise to do the job right the first time.

They also sell and install **Heated** Electronic Controlled Wiper Blades. Ask them for a demonstration of this amazing new product.
